Dear Parents:

The School Health Law requires medical and dental exams for children upon entering school.

We are recommending that your family physician and dentist do these exams, since they can best evaluate your child's health and assist you in obtaining necessary treatments and corrections. However, these exams may be done by the School Physician/Dentist if you prefer.

The family physician's/dentist's exam may be done anytime over the summer or before September 1<sup>st</sup> using the attached forms.

The school will provide these exams if you indicate below.

**Please return this letter by September 1<sup>st</sup>.**

I prefer my family physician's exam and I'm submitting the completed form.

I prefer the school physician to examine my child.

I prefer my family dental exam and will return the completed form.

I prefer the school dentist's exam.
